Springvale
Level Crossing Removal

Information Update

August 2013

Significant progress has been made by the Springvale Level Crossing Removal project team over the last two months.

The closure of car parks at Springvale Station has allowed work to begin on construction of the retaining walls for the new rail cutting underneath Springvale Road. Other key achievements have included the completion of the new right-turn lane from Springvale Road into Lightwood Road and a number of major service relocations including gas, storm water and communications.

Even more activity can be expected over the coming weeks as the project team continues to push to deliver high-quality outcomes for the Springvale community. The month of September in particular will be extremely busy, with works continuing full-time around the clock in order to complete some key activities during road and rail closures. Some of the key construction activities are as follows:

Springvale Road closures

In order to allow the project team to construct the new bridge section of Springvale Road, a series of closures will be put in place at the level crossing throughout August and September:

- From 31 August to 7 September 2013 the road will be closed from 8pm-6am
- Springvale Road will be fully closed from the evening of Friday 20 September until Sunday 29 September 2013

vicroads

State Government Victoria

Detours will be in place for traffic during these closures (see map). Pedestrian access will be maintained through the level crossing, however please allow some additional time if you are walking to Springvale Station. There will also be some impacts on local roads such as Sandown Road, which will be closed at times during these works.

A shuttle bus service will operate for passengers wanting to catch the No.902 bus service between Springvale Station and Princes Highway.

Sandown Road becomes one-way

From Tuesday 20 August 2013 Sandown Road will become one-way only between Kelvin Grove and Springvale Road, with vehicles only able to exit onto Springvale Road. These conditions will remain in place for approximately 10 months.

Sandown Road will remain open to two-way traffic between Kelvin Grove and Sandown Racecourse, and alternative access to Sandown Road will be via Virginia Street and Merton Street. The footpath along the south side of Sandown Road will be closed at this time.

Rail shutdown weekends

There will be no trains running on the weekends of 23-25 August or 6-8 September while works are carried out at Springvale Station and along the rail corridor. Buses will replace trains during this time. Please call Public Transport Victoria on 1800 800 007 or visit ptv.vic.gov.au for more information on train and replacement bus services.

Closure of Platform 2 at Springvale Station

From 26 August 2013 there will be a new entrance to Platform 2 at Springvale Station (for trains heading towards Pakenham, Cranbourne and Dandenong). The new entrance will be located around 100m further down Sandown Road.

To allow works to continue on the new rail cutting, Platform 2 will then be closed from Monday 9 September 2013 for two weeks. Trains will not stop at Platform 2 during this period. A shuttle bus service will operate between Sandown Park Station and Springvale Station while the closure is in place. There will be some noise from night works during this period as works will be carried out continuously while the platform is closed.
