4 Position tag on windscreen

Before you attach the tag and holder to the windscreen, check it will fit on the windscreen without blocking the driver’s vision.

Cars

If your vehicle does not have a metallised windscreen, position the tag behind the rear vision mirror (below any tinted sunscreen area). If your vehicle has a metallised windscreen, consult your vehicle’s handbook or manufacturer to determine where the tag should be positioned.

Trucks

Position the tag vertically, with the holder at its foot, near the bottom of the windscreen (above any metallic stone guard). If your vehicle has a metallised windscreen, consult your vehicle’s handbook or manufacturer to determine where the tag should be positioned.

5 Attach tag and holder to windscreen

Remove the adhesive backing from the back of the holder, and press the tag and holder firmly to the windscreen for at least 10 seconds. Do not disturb for at least 24 hours to allow the adhesive to set.

If you have installed the tag and it does not beep when passing under a tolling gantry, please phone us on (03) 9955 1400.
